Soil Sample Instructions

Use a small trowel to remove equal measures of the top six inches of soil from five different areas of a field or plot of up to five acres in size. (Larger plots will require multiple tests.)

1. Thoroughly mix the five measures together.
2. Seal approximately two cups of the mixed soil into the provided sample bag (or a clean plastic bag).
3. Complete the soil test form (see previous page).
4. Detach and mail upper portion of completed soil test form with your soil sample and check for \$15.95 made payable to **Rock River Laboratory** to:

Rock River Laboratory
710 Commerce Dr.
P.O. Box 169
Watertown, WI 53094-0169
