- + Great for Mass Plantings
- + Color Variety
- + Low Maintenance
- + Legume Fixation
- + Erosion Control
- + Pollinator Strips
- +

Our Native Wildflower & Forbs Mix is a carefully selected blend of wildflowers for the curated native restoration planting. Utilize an array of diverse species for land restoration projects, provide beneficial pollinator habitat and food source, or plant for the beauty alone! The species in this mix are a combination of annuals and perennials, selected for their attractive and abundant blooms.

Combine this mix with our Upland Native Grass Mix or Lowland Native Grass mix for the ultimate native planting! Use 2-4 lbs. per acre with 5 lbs. of either Native Grass Mix for best results.

Components by weight %:
