

# EXCEED

Superior Legume Inoculant

# Soybeans PEAT

[www.visjonbiologics.com](http://www.visjonbiologics.com)

Contains: *Bradyrhizobium japonicum*

## Product 1008

Treats 1500#, 25 bushel, or 30 units of seed.  
Net Weight 75 oz.  
Package Configuration: 6 units per case, 48 cases per pallet

## Product 1009

Treats 300#, 5 bushel, or 6 units of seed.  
Net Weight 15 oz.  
Package Configuration: 35 units per case, 48 cases per pallet

## Directions for Use:

### Moistened Seed Method

- Sprinkle non-chlorinated, clean, cool water on seed at a rate of 8.5 oz. of water per 50 pounds of seed either in the drill box or in an outside container
- Add EXCEED inoculant at recommended rate to moistened seed and mix until seed is thoroughly coated.

### Dry Seed Method

- Fill drill box 1/4 or 1/3 full of seed and mix inoculant thoroughly until seed is uniformly coated. Continue with same process until drill is full of seed and thoroughly inoculated.
- Use the Dry Method when inoculating seed that has been treated with fungicides and/or insecticides to prevent adverse reaction to the inoculant. Plant as soon as possible after inoculating and preferably within 48 hours.

### First Year Beans and Adverse Environmental Condition

- In planting situations where soybeans have never been grown or haven't been grown for 5 years, it is recommended that EXCEED Peat be used at 2x the normal rate or use EXCEED Peat in combination with EXCEED Traditional Liquid inoculant or EXCEED Granular inoculant.

Where high levels of nitrogen are available in the soil or over 30 lbs. of available nitrogen have been applied to the soil, rhizobia inoculants will not perform at optimum level.

## Storage of EXCEED Peat:

- AVOID STORAGE IN DIRECT SUNLIGHT AND STORE PRODUCT AT TEMPERATURE UNDER 78° F.
- KEEP PRODUCT COOL AND OUT OF SUNLIGHT AND ONLY OPEN WHEN READY TO USE.
- EXCEED PEAT FOR SOYBEANS CARRIES A ONE-SEASON SHELF LIFE AND SHOULD BE USED BEFORE EXPIRATION.

## EXCEED PEAT FOR SOYBEANS IS NOT A PLANT FOOD PRODUCT.

**EXCEED PEAT FOR SOYBEANS IS A NATURALLY OCCURRING BRADYRHIZOBIUM THAT FORMS NODULES ON THE ROOTS OF THE SOYBEAN PLANT AND CONVERTS ATMOSPHERIC NITROGEN TO A FORM THAT THE PLANT CAN USE. THIS IS A NATURALLY OCCURRING SYMBIOTIC RELATIONSHIP BETWEEN THE SOYBEAN PLANT AND BRADYRHIZOBIUM THAT PROVIDES THE SOYBEAN PLANT WITH THE MAJORITY OF THE NITROGEN REQUIRED BY THE PLANT.**

## Precautionary Information:

While EXCEED PEAT is completely organic and non-toxic it is recommended that the applicator avoid inhalation. Visjon Biologics recommends the use of gloves and eye protection while using EXCEED PEAT.

## Minimum Guarantee:

This inoculant guarantees a minimum of 200 million ( $2 \times 10^8$ ) viable cells of *Bradyrhizobium japonicum* per gram.

## Limited Warranty:

VISJON BIOLOGICS GUARANTEES THIS CULTURE TO PRODUCE SATISFACTORY NODULE FORMATION AND NITROGEN FIXATION UNDER FAVORABLE CONDITIONS OF SOIL AND CLIMATE WHEN USED BEFORE EXPIRATION DATE AND APPLIED UNDER THE MANUFACTURER'S SPECIFICATIONS, OR PURCHASE PRICE WILL BE REFUNDED. A VISJON BIOLOGICS REPRESENTATIVE MUST BE NOTIFIED OF ANY FIELD COMPLAINT WITHIN FIFTY (50) DAYS AFTER PLANTING. MANY FACTORS OTHER THAN NODULATION AFFECT CROP PERFORMANCE. VISJON BIOLOGICS ASSUMES NO RESPONSIBILITY FOR LOSS OR PARTIAL LOSS OF CROP FROM ANY CAUSE WHATSOEVER. THIS LIMITED WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED. THE LIMITED WARRANTY IS VOID WHERE PROHIBITED BY LAW. IF YOU HAVE ANY QUESTIONS ABOUT THIS PRODUCT OR ANY OTHER VISJON BIOLOGICS PRODUCT, CALL 940-264-0343 FOR ASSISTANCE.
